

Constellation Financing Systems Adds Ivory Consulting's SuperTRUMP Pricing Tool to ASSET Equipment Finance Portfolio Management System

New built-in financial analysis tools enhance competitive advantage of company's equipment finance portfolio management and accounting system

Toronto, Canada. February 18th, 2010

Constellation financing systems has announced the enhancement of its ASSET portfolio management system with the integration of equipment leasing industry's standard pricing technology. By offering the capabilities of SuperTRUMP from Ivory Consulting within its core equipment finance solution, Constellation enables ASSET users to quickly and accurately calculate taxes, accounting entries, cash flows and termination values in investments ranging from simple single-investor leases, operating leases and straightforward loans to highly structured leveraged leases.

Constellation Financing Systems Vice President David Taylor commented, "We are gratified to be able to extend the power of ASSET by combining our system with the industry's most powerful lease pricing software. ASSET users can now access the full capabilities of SuperTRUMP without ever having to switch screens or applications. This integration not only minimizes the learning curve for new SuperTRUMP users, it also eliminates the need for repetitive keying-in of information, allowing ASSET users to get their customers the answers they need without delay."

Ivory Consulting's SuperTRUMP is already in use throughout all niches of the commercial equipment leasing industry, by lessors, lenders, lessees, advisors, brokers and syndicators. In offering industry-standard lease/loan pricing technology within its core equipment finance system, Constellation Financing Systems strengthens its position among leasing technology providers, offering a fully asset-based portfolio management and accounting system with the power of SuperTRUMP now included.

Chris Ivory, president and owner of Ivory Consulting, provider of SuperTRUMP, commented "With are delighted to welcome Constellation's ASSET to the list of equipment leasing systems that utilize the unrivalled power of SuperTRUMP to manage the challenging financial analysis and optimization calculations needed for commercial asset lease and loan transactions. We salute the Constellation Financing Systems technology team for an integration thoughtfully planned and well executed."

The new interface to SuperTRUMP will simplify the replacement of competitors' systems with Constellation's ASSET, as a growing number of equipment finance providers start to plan the purchase of technology to replace older legacy systems that are becoming increasingly burdensome to support within contemporary banking and manufacturers' IT infrastructures. Customers leaving older systems will be able to continue to use their existing SuperTRUMP data and templates as they transition to ASSET, streamlining the transition to a new system and reducing implementation costs significantly.

The SuperTRUMP interface will be immediately available for users of Constellation Financing Systems' ASSET portfolio management and accounting system in the U.S. and Canada.
