INTEGRATION

A smarter, better, faster way to collect outstanding customer payments.

INFINITY ASSET is now integrated with Payroc's payment solution processing. The INFINITY ASSET + Payroc payment solution will allow an INFINITY ASSET user to instantly withdraw Credit Card or Debit Card funds from a customer using Payroc's secure Payment Card Industry (PCI) compliant methodology.

Each successful withdrawal will create and post a cash batch, allocated to Cash On Account. The INFINITY ASSET Auto Allocate Module will then auto allocate the credits to open receivables automatically (based upon client's initial setup parameters).

The INFINITY ASSET + Payroc Integrated Payment Solution offers:

- Increased client payments
- Immediate return payment notification
- Decreased return charges
- Decreased collection losses
- Decreased collection days
- Reduced outstanding collections amount
- No third-party website
- Auto allocate Cash On Account
- PCI Full compliance
