

eSign Module

Simplify your document workflow with quicker turnaround and improved customer engagement using our eSign module.

The INFINITY EDGE eSign module captures digital signatures on contracts, documents, and forms. The user-friendly interface will help you create documents for signatures, review them, package them together and send for e-Signatures via email. Get alerts instantly when documents are signed, and access it all through INFINITY EDGE.

Stop wasting time on snail mail or difficult to read scanned documents. Turn days into minutes by using INFINITY EDGE eSign.

The INFINITY EDGE eSign module offers:

- Complete signing session from any computer
- Capture secure signatures from parties anywhere, anytime
- Security and compliancy with Electronic Signature Law
- True paperless workflow
- Increased client satisfaction
- Centralized document storage
- Ease of use for vendors and customers
- Save time and money
